

Anti-CD32b/Fc gamma RIIB/FCGR2B antibody

Catalog Number: 103354

Product name

Rabbit IgG

Anti-CD32b/Fc gamma RIIB/FCGR2B antibody

Applications

Immunogen

ELISA, IHC-P

[Cynomolgus CD32b/Fc gamma RIIB/FCGR2B \(His Tag\) recombinant protein](#)

Dilutions

ELISA: 0.1-0.2 µg/mL

Specificity

Cynomolgus CD32b / Fc gamma RIIB

This antibody can be used at 0.1-0.2 µg/mL with the appropriate secondary reagents to detect Cynomolgus CD32b. The detection limit for Cynomolgus CD32b is approximately 0.00245 ng/well.

Antibody description

Rabbit polyclonal to CD32b/Fc gamma RIIB/FCGR2B

IHC-P: 0.1-2 µg/mL

Preparation

Produced in rabbits immunized with purified, recombinant Cynomolgus CD32b / Fc gamma RIIB (rC CD32b / Fc gamma RIIB; AAL92097.1; Met 1-Pro 217). CD32b / Fc gamma RIIB specific IgG was purified by Cynomolgus CD32b / Fc gamma RIIB affinity chromatography.

Validations

Formulation

0.2 µm filtered solution in PBS with 5% trehalose

CD32b / Fc gamma RIIB Antibody, Rabbit PAb, Antigen Affinity Purified, Immunohistochemistry

Storage

This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free.

Immunochemical staining of cynomolgus CD32b in human liver with rabbit polyclonal antibody (1 µg/mL, formalin-fixed paraffin embedded

Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.

Clonality

Polyclonal
