Catalog Number: 500812

# **General Information**

#### Gene Name Synonym

Thyroid receptor-interacting protein 7

#### **Protein Construction**

A DNA sequence encoding the mature form of human HMGN3 (Q15651-2) (Met1-Asn77) was expressed with a polyhistide tag at the Nterminus.

#### Organism

Human

### **Expression Host**

E. coli

## **QC Testing**

#### Purity

> 96 % as determined by SDS-PAGE

#### Endotoxin

Please contact us for more information.

#### Stability

Samples are stable for up to twelve months from date of receipt at -70°C

## **Predicted N terminal**

His

## **Molecular Mass**

The recombinant human HMGN3 consists of 92

amino acids and predicts a molecular mass of 10.2 KDa. It migrates as an approximately 16 KDa band in SDS-PAGE under reducing conditions.

## Formulation

Lyophilized from sterile 50mM Tris, 50mM Arg, 10% glycerol, pH 8.5 1. 5 % trehalose and mannitol are added as protectants before lyophilization. 2. Please contact us for any concerns or special requirements.

## **Usage Guide**

### Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

## Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.
