Catalog Number: 500969

# **General Information**

#### **Protein Construction**

A DNA sequence encoding the Influenza A virus (A/California/07/2009(H1N1))] hemagglutinin (ACP41953.1) (Met1-Gln529), termed as HA, was expressed with a polyhistidine tag at the Cterminus.

#### Organism

H1N1

#### **Expression Host**

Baculovirus-Insect Cells

# **QC Testing**

### Activity

1. Measured by its ability to bind with Neu5Aca2-3Galb1-4GlcNAcb-PAA-biotin (01-077) using the Octet RED System. 2. Measured by its ability to agglutinate guinea pig red blood cells. HA titer is 1-6  $\mu$ g/mL for 1% GRBC.

### Purity

> 95 % as determined by SDS-PAGE.

### Endotoxin

 ${<}1.0$  EU per  $\mu g$  protein as determined by the LAL method.

## Stability

Samples are stable for up to twelve months from date of receipt at -70  $^{\circ}\mathrm{C}$ 

## **Predicted N terminal**

Asp

## **Molecular Mass**

The recombinant hemagglutinin of Influenza A virus (A/California/07/2009(H1N1))] consists 523 amino acids and predicts a molecular mass of 59 kDa.

## Formulation

Lyophilized from sterile 20 mM Tris, 500 mM NaCl, 10 % glycerol, pH 8.0. 1. 5 % trehalose and mannitol are added as protectants before lyophilization. 2. Please contact us for any concerns or special requirements.

# **Usage Guide**

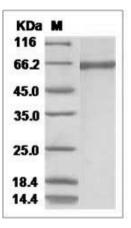

## Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

### Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

## SDS-PAGE

HA protein SDS-PAGE
