Human DPP7 / DPPII / DPP2 (His Tag) recombinant protein

Catalog Number: 501506

General Information

Gene Name Synonym

Dipeptidyl aminopeptidase II; Dipeptidyl peptidase 7; Dipeptidyl peptidase II; Quiescent cell proline dipeptidase

Protein Construction

A DNA sequence encoding the human DPPII (NP_037511.2) (Met 1-Leu 492) with a C-terminal polyhistidine tag was expressed.

Organism

Human

Expression Host

Human Cells

QC Testing

Purity

> 98 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per μg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70 $^{\circ}\mathrm{C}$

Predicted N terminal

Gly 22

Molecular Mass

The secreted recombinant human DPPII comprises 482 amino acids with a predicted molecular mass of 53.6 kDa. As a result of glycosylation, rh DPPII migrates as an approximately 60 kDa band in SDS-PAGE under reducing conditions. **Formulation**

Lyophilized from sterile PBS, pH 7.41. 5 % trehalose and mannitol are added as protectants before lyophilization.2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.
