

H11N9 HA (His Tag) recombinant protein

Catalog Number: 502248

General Information

Protein Construction

A DNA sequence encoding the extracellular domain (Met 1-Lys 528) of the influenza hemagglutinin (A/mallard/Alberta/294/1977 (H11N9)) (ABB87228.1), (HA1+HA2, uncleaved) was fused with a C-terminal polyhistidine tag.

Organism

H11N9

Expression Host

Human Cells

QC Testing

Purity

> 97 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per μg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Asp 17

Molecular Mass

The secreted recombinant influenza A H11N9 HA (A/mallard/Alberta/294/1977 (H11N9)) comprises

523 amino acids and has a predicted molecular mass of 58.7 kDa. As a result of glycosylation, it migrates as an approximately 65-70 kDa band in SDS-PAGE under reducing conditions.

Formulation

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C . It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

SDS-PAGE

Influenza A H11N9 (A/mallard/Alberta/294/1977) Hemagglutinin / HA Protein (His Tag) SDS-PAGE
