

Canine CD40/TNFRSF5 recombinant protein

Catalog Number: 502382

General Information

Gene Name Synonym

B-cell surface antigen CD40; CD40L receptor

Protein Construction

A DNA sequence encoding the canine CD40 (Q7YRL5) (Met1-Ala194) was expressed with six amino acids (LEVLFQ) at the C-terminus.

Organism

Canine

Expression Host

Human Cells

QC Testing

Purity

> 95 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per µg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Glu 21

Molecular Mass

The recombinant canine CD40 is a disulfide-linked

homodimer. The reduced monomer comprises 181 amino acids and has a predicted molecular mass of 19.9 kDa. The apparent molecular mass of the protein is approximately 28-32 kDa in SDS-PAGE under reducing conditions.

Formulation

Lyophilized from sterile PBS, pH 7.4.

1. 5 % trehalose and mannitol are added as protectants before lyophilization.
2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

SDS-PAGE

Canine CD40 / TNFRSF5 Protein SDS-PAGE
