

Mouse Axl Kinase (His & Fc Tag) recombinant protein

Catalog Number: 503398

General Information

Gene Name Synonym:

Adhesion-related kinase

Protein Construction:

A DNA sequence encoding the extracellular domain (Met 1-Pro 443) of mouse AXL (NP_033491.2) precursor was fused with the C-terminal polyhistidine-tagged Fc region of human IgG1 at the C-terminus.

Source: Mouse

Expression Host: Human Cells

QC Testing

Activity:

Purity:

> 90 % as determined by SDS-PAGE

Endotoxin:

< 1.0 EU per μg of the protein as determined by the LAL method

Stability:

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal:

His 20

Molecular Mass:

The recombinant mouse AXL/Fc is a disulfide-linked homodimer after removal of the signal peptide. The reduced monomer consists of 672

amino acids and has a predicted molecular mass of 74.5 kDa. In SDS-PAGE under reducing conditions, the apparent molecular mass of rmAXL/Fc monomer is approximately 100-110 kDa due to glycosylation.

Formulation:

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage:

Store it under sterile conditions at -20°C to -80°C .

It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution:

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

SDS-PAGE:

Mouse Axl Kinase Protein (His & Fc Tag) SDS-PAGE
