

# H2N2 HA (His Tag) recombinant protein

Catalog Number: 503569

## General Information

### Protein Construction

A DNA sequence encoding the Influenza A virus (A/Guiyang/1/1957(H2N2)) hemagglutinin (ACD85231.1) (Met1-Gln525) was expressed with a C-terminal polyhistidine tag.

### Organism

H2N2

### Expression Host

Baculovirus-Insect Cells

## QC Testing

### Activity

Measured by its ability to agglutinate guinea pig red blood cells.  
HA titer is 1-4 ng/mL for 1% GRBC.

### Purity

> 95 % as determined by SDS-PAGE

### Endotoxin

< 1.0 EU per  $\mu\text{g}$  of the protein as determined by the LAL method

### Stability

Samples are stable for up to twelve months from date of receipt at  $-70^{\circ}\text{C}$

### Predicted N terminal

Asp 16

### Molecular Mass

The recombinant hemagglutinin of Influenza A

virus (A/Guiyang/1/1957(H2N2)) comprises 521 amino acids and has a predicted molecular mass of 59 kDa. The apparent molecular mass of the protein is approximately 61 kDa in SDS-PAGE under reducing conditions.

### Formulation

Lyophilized from sterile 20 mM Tris, 500 mM NaCl, 10 % glycerol, pH 7.4.

- 5 % trehalose and mannitol are added as protectants before lyophilization.
- Please contact us for any concerns or special requirements.

## Usage Guide

### Storage

Store it under sterile conditions at  $-20^{\circ}\text{C}$  to  $-80^{\circ}\text{C}$ . It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

### Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

### SDS-PAGE

Influenza A H2N2 (A/Guiyang/1/1957)  
Hemagglutinin / HA Protein (His Tag) SDS-PAGE
