

Mouse IFNA4 (Fc Tag) recombinant protein

Catalog Number: 503695

General Information

Protein Construction

A DNA sequence encoding the extracellular domain of mouse IFNA4 (NP_034634.1) (Cys 25-Glu 186) was fused with the Fc region of human IgG1 at the N-terminus.

Organism

Mouse

Expression Host

Human Cells

QC Testing

Activity

Measured in antiviral assays using L929 cells infected with vesicular stomatitisvirus (VSV). The ED₅₀ for this effect is typically 0.2-1 ng/mL.

Purity

> 85 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per µg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Glu

Molecular Mass

The recombinant mouse IFNA4/Fc is a disulfide-linked homodimer. The reduced monomer comprises 422 amino acids and has a calculated molecular mass of 47.2 kD as estimated in SDS-PAGE under reducing conditions.

Formulation

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.
