

General Information

Protein Construction

A DNA sequence encoding the extracellular domain of Influenza B virus (B/Florida/4/2006) (ACA33493.1) hemagglutinin (Met 1-Ala 555) (Native, HA1+HA2, uncleaved) was expressed with a C-terminal polyhistidine tag.

Organism

Influenza B

Expression Host

Human Cells

QC Testing

Purity

> 90 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per μg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Asp 16

Molecular Mass

The secreted recombinant hemagglutinin of Influenza B virus (B/Florida/4/2006)) comprises

551 amino acids with the predicted molecular mass of 60 kDa. As a result of glycosylation, it migrates as an approximately 75 kDa band in SDS-PAGE under reducing conditions.

Formulation

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C . It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.
