

H3N2 HA (His Tag) recombinant protein

Catalog Number: 503965

General Information

Protein Construction

A DNA sequence encoding the extracellular domain of influenza A virus hemagglutinin (A/Perth/16/2009 (H3N2)) (Met 1-Trp 530) (ACS71642.1) was fused with a polyhistidine tag at the C-terminus.

Organism

H3N2

Expression Host

Human Cells

QC Testing

Purity

> 90 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per μg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Gln 17

Molecular Mass

The secreted recombinant hemagglutinin of Influenza A virus (A/Perth/16/2009(H3N2))

comprises 525 amino acids and has a predicted molecular mass of 59 kDa. As a result of glycosylation, it migrates as an approximately 65-70 kDa band in in reduced SDS-PAGE.

Formulation

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C . It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.
