

General Information

Protein Construction

A DNA sequence encoding the extracellular domain (Met 1-Ala 556) of the influenza B hemagglutinin (B/Brisbane/60/2008) (ACN29380.1) was fused with a polyhistidine tag at the C-terminus.

Organism

Influenza B

Expression Host

Human Cells

QC Testing

Purity

> 90 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per μg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Asp 16

Molecular Mass

The secreted recombinant influenza A H5N1 HA (influenza B virus (B/Brisbane/60/2008)) comprises 552 amino acids and has a predicted

molecular mass of 60 kDa. As a result of glycosylation, it migrates as an approximately 80-90 kDa band in SDS-PAGE under reducing conditions.

Formulation

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.
2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C . It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

SDS-PAGE

Influenza B (B/Brisbane/60/2008) Hemagglutinin / HA Protein (His Tag) SDS-PAGE
