Human MAG/GMA/Siglec-4 (Fc Tag) recombinant protein

Catalog Number: 504111

General Information

Gene Name Synonym

Siglec-4a

Protein Construction

A DNA sequence encoding the human MAG (P20916-1) (Met1-Pro516) was expressed with the Fc region of human IgG1 at the C-terminus.

Organism

Human

Expression Host

Human Cells

QC Testing

Purity

> 95 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per μg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70 $^{\circ}\mathrm{C}$

Predicted N terminal

Gly 20

Molecular Mass

The recombinant human MAG/Fc is a disulfide-

linked homodimer. The reduced monomer comprises 738 amino acids and has a predicted molecular mass of 81.7 kDa. The apparent molecular mass of the protein is approximately 113 kDa in SDS-PAGE under reducing conditions. **Formulation**

Lyophilized from sterile PBS, pH 7.41. 5 % trehalose and mannitol are added as protectants before lyophilization.2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.
