# **Human ATP6V0D1 Recombinant protein (GST tag)**

Catalog Number: 505649

#### **General Information**

#### Gene Name Synonym

V-ATPase subunit d 1; 32 kDa accessory protein; V-ATPase 40 kDa accessory protein; V-ATPase AC39 subunit; p39; Vacuolar proton pump subunit d 1

#### **Protein Construction**

A DNA sequence encoding the human ATP6V0D1 (NP\_004682.2) 1-351 aa was fused with the N-terminal GST tag  $\,$ 

#### **Organism**

Human

#### **Expression Host**

E. coli

# **QC Testing**

### **Activity**

Not tested.

#### **Endotoxin**

Please contact the lab for more information.

## **Stability**

Store for up to 12 months at -20°C to -80°C as lyophilized powder.

#### **Formulation**

Protein lyophilized in sterile PBS (58 mM Na2HPO4, 17 mM NaH2PO4, 68 mM NaCl, 100 mM GSH, pH 8.0). Trehalose (5-8%) and mannitol

(5-8%) protectants were added before lyophilization.

# **Usage Guide**

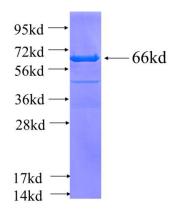

#### **Storage**

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

#### Reconstitution

Reconstitute at  $0.25~\mu g/\mu l$  in sterile water for short-term storage. Reconstitution with 50% glycerol solution is recommended for longer term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.

#### **SDS-PAGE**

Recombinant human ATP6V0D1(Full length) SDS-PAGE
