

# Human LCAT (His tag) recombinant protein

Catalog Number: 518267

## General Information

### Gene Name Synonym

Phosphatidylcholine-sterol acyltransferase, also named Lecithin-cholesterol acyltransferase, Phospholipid-cholesterol acyltransferase and LACT, is an extracellular cholesterol esterifying enzyme which belongs to the AB hydrolase superfamily.

### Protein Construction

A DNA sequence encoding the Human LCAT Phe25-Glu440 is expressed with a 6His tag at the C-terminus.

### Organism

Human

### Expression Host

Human Cells

## QC Testing

### Purity

>95% as determined by SDS-PAGE.

### Endotoxin

<1.0 EU per  $\mu\text{g}$  protein as determined by the LAL method.

### Stability

Store for up to 12 months at  $-20^{\circ}\text{C}$  to  $-80^{\circ}\text{C}$  as lyophilized powder. Aliquots of reconstituted

samples are stable at  $< -20^{\circ}\text{C}$  for 3 months.

### Formulation

Lyophilized from a  $0.2 \mu\text{m}$  filtered solution of 50mM Acetate Buffer pH-4.0.

## Usage Guide

### Storage

Lyophilized protein should be stored at  $< -20^{\circ}\text{C}$ , though stable at room temperature for 3 weeks. Reconstituted protein solution can be stored at  $4-7^{\circ}\text{C}$  for 2-7 days.

### Reconstitution

Always centrifuge tubes before opening. Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than  $100\mu\text{g/ml}$ . Dissolve the lyophilized protein in ddH<sub>2</sub>O. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.

## SDS-PAGE

Human LCAT (His tag) recombinant protein
