

Human MAD2L1 (NM_002358) cDNA/ORF clone

Catalog Number: 713140-1

General Information

Gene Name:

MAD2 mitotic arrest deficient-like 1 (yeast)

Official Symbol: MAD2L1

Organism: Homo sapiens

RefSeq: NM_002358

Description

Sequence Description:

Identical with the Gene Bank Ref. ID sequence.

Vector:

Restriction Sites:

Shipping carrier:

Each tube contains approximately 5 µg - 10 µg of lyophilized plasmid.

Storage:

The lyophilized plasmid can be stored at ambient temperature for three months.

Quality control:

The plasmid is confirmed by full-length sequencing with primers in the sequencing primer list.

Sequencing primer list:

:

:

Plasmid Resuspension protocol

1. Centrifuge at 5,000×g for 5 min.
2. Carefully open the tube and add 20 µl of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin to concentrate the liquid at the bottom. Speed is less than 5000×g.
5. Store the plasmid at -20 °C.

The plasmid is ready for:

E.coli strains for transformation (recommended but not limited):

Most commercially available competent cells are appropriate for the plasmid, e.g. TOP10, DH5α and TOP10F'.
