

Mouse IL-2 recombinant protein

Catalog Number: 502190

General Information

Gene Name Synonym

T-cell growth factor

Protein Construction

A DNA sequence encoding the soluble form of mouse IL2 (P04351) (Ala 21-Gln 169) was expressed, with an initial Met at the C-terminus.

Organism

Mouse

Expression Host

E. coli

QC Testing

Activity

1. Measured by its ability to bind recombinant human IL2Ra-Fc (Cat:503136) in a functional ELISA.
2. Measured in a cell proliferation assay using CTLL2. The ED₅₀ for this effect is typically 0.2-1.0 ng/mL.

Purity

> 92 % as determined by SDS-PAGE

Endotoxin

Please contact us for more information.

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Met

Molecular Mass

The recombinant mouse IL2 consists of 150 amino acids and has a calculated molecular mass of 17.4KDa. It migrates as an approximately 19 kDa in SDS-PAGE under reducing conditions.

Formulation

1. Lyophilized from sterile PBS, 2mM DTT, pH 7.4
2. 5 % trehalose and mannitol are added as protectants before lyophilization.
3. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.
