## Preparation

Produced in rabbits immunized with purified, recombinant Ebola virus EBOV (subtype Zaire, strain Mayinga 1976) GP-RBD / Glycoprotein (AAC54887.1; Met1-Phe308), and purified by antigen affinity chromatography.

## Formulation

0.2 µm filtered solution in PBS

## Storage

This antibody can be stored at 2°C-8°C for one month without detectable loss of activity. Antibody products are stable for twelve months from date of receipt when stored at -20°C to -80°C. Preservative-Free.

Sodium azide is recommended to avoid contamination (final concentration 0.05%-0.1%). It is toxic to cells and should be disposed of properly. Avoid repeated freeze-thaw cycles.
