

Human Epcr/PROCR (His Tag) recombinant protein

Catalog Number: 503649

General Information

Gene Name Synonym

Activated protein C receptor; Endothelial cell protein C receptor

Protein Construction

A DNA sequence encoding the extracellular domain of human PROCR (Q9UNN8) (Met 1-Thr 209), was fused with a polyhistidine tag at the C-terminus.

Organism

Human

Expression Host

Human Cells

QC Testing

Purity

> 97 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per μg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Ser 18

Molecular Mass

The secreted recombinant human PROCR consists of 203 amino acids and has a predicted molecular mass of 23.4 kDa. The apparent molecular mass of rhPROCR is approximately 37 kDa in SDS-PAGE under reducing conditions due to glycosylation.

Formulation

Lyophilized from sterile PBS, pH 7.4

1. 5 % trehalose and mannitol are added as protectants before lyophilization.
2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C . It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

SDS-PAGE

Human Epcr / PROCR Protein (His Tag) SDS-PAGE
