

H2N2 HA (His Tag) recombinant protein

Catalog Number: 503569

General Information

Protein Construction

A DNA sequence encoding the Influenza A virus (A/Guiyang/1/1957(H2N2)) hemagglutinin (ACD85231.1) (Met1-Gln525) was expressed with a C-terminal polyhistidine tag.

Organism

H2N2

Expression Host

Baculovirus-Insect Cells

QC Testing

Activity

Measured by its ability to agglutinate guinea pig red blood cells.
HA titer is 1-4 ng/mL for 1% GRBC.

Purity

> 95 % as determined by SDS-PAGE

Endotoxin

< 1.0 EU per μg of the protein as determined by the LAL method

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Asp 16

Molecular Mass

The recombinant hemagglutinin of Influenza A

virus (A/Guiyang/1/1957(H2N2)) comprises 521 amino acids and has a predicted molecular mass of 59 kDa. The apparent molecular mass of the protein is approximately 61 kDa in SDS-PAGE under reducing conditions.

Formulation

Lyophilized from sterile 20 mM Tris, 500 mM NaCl, 10 % glycerol, pH 7.4.

- 5 % trehalose and mannitol are added as protectants before lyophilization.
- Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C . It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.
