

Human Latexin (His Tag) recombinant protein

Catalog Number: 503652

General Information

Gene Name Synonym

Endogenous carboxypeptidase inhibitor; Protein MUM; Tissue carboxypeptidase inhibitor

Protein Construction

A DNA sequence encoding the human Latexin (NP_064554.3) (Glu 2-Glu222) was expressed, fused with a polyhistidine tag at the N-terminus.

Organism

Human

Expression Host

E. coli

QC Testing

Purity

> 97 % as determined by SDS-PAGE

Endotoxin

Please contact us for more information.

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

Met

Molecular Mass

The recombinant human LXN consists of 230

amino acids and predicts a molecular mass of 26.8 kDa which is also estimated by SDS-PAGE.

Formulation

Lyophilized from sterile 20mM HEPES, 0.1M KCl, pH 7.5

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

SDS-PAGE

Human Latexin / LXN / TCI Protein (His Tag) SDS-PAGE
