

General Information

Gene Name Synonym

Alpha-1-microglobulin; Alpha-1 microglycoprotein; Complex-forming glycoprotein heterogeneous in charge; Inter-alpha-trypsin inhibitor light chain; Bikunin; EDC1; HI-30; Uronic-acid-rich protein; Trypstatin

Protein Construction

A DNA sequence encoding the human AMBP (CAA38587.1) (Ala206-Leu348) was expressed with a polyhistidine tag at the N-terminus.

Organism

Human

Expression Host

Yeast

QC Testing

Purity

> 85 % as determined by SDS-PAGE.

Endotoxin

Please contact us for more information.

Stability

Samples are stable for up to twelve months from date of receipt at -70°C

Predicted N terminal

His

Molecular Mass

The recombinant human AMBP consists 161 amino acids and predicts a molecular mass of 17.4 kDa.

Formulation

Lyophilized from sterile PBS, pH 7.4.

1. 5 % trehalose and mannitol are added as protectants before lyophilization.

2. Please contact us for any concerns or special requirements.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Adding sterile water, prepare a stock solution of 0.25 mg/ml. Concentration is measured by UV-Vis.

SDS-PAGE

Human AMBP / Alpha 1 microglobulin Protein (His Tag)
