

## General Information

### Protein Construction

C-terminal 6His tag was fused to 1-793 aa encoded by NM\_001048201

### Organism

Human

### Expression Host

E. coli

## QC Testing

### Activity

Not tested

### Purity

90%, by SDS-PAGE with Coomassie Brilliant Blue staining.

### Endotoxin

N.A.

### Stability

Samples are stable for up to twelve months from date of receipt at -70°C

### Molecular Mass

91 kDa including tags

### Formulation

The purified protein was Lyophilized from sterile PBS (58mM Na<sub>2</sub>HPO<sub>4</sub>, 17mM NaH<sub>2</sub>PO<sub>4</sub>, 68mM

NaCl, pH8.0). 5 % trehalose and 5 % mannitol are added as protectants before lyophilization

## Usage Guide

### Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

### Reconstitution

Reconstitute at 0.25 µg/µl in 200 µl sterile water for short-term storage. Reconstitution with 200 µl 50% glycerol solution is recommended for longer term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.

## SDS-PAGE

Human E3 ubiquitin-protein ligase UHRF1
