

Human GTF2H3 Recombinant protein (His tag)

Catalog Number: 508564

General Information

Gene Name Synonym

Basic transcription factor 2 34 kDa subunit; BTF2 p34; General transcription factor IIH polypeptide 3; TFIIH basal transcription factor complex p34 subunit

Protein Construction

A DNA sequence encoding the human GTF2H3 (NP_001507.2) 24-210 aa was fused with the polyhistidine tag

Organism

Human

Expression Host

E. coli

QC Testing

Activity

Not tested.

Endotoxin

Please contact the lab for more information.

Stability

Aliquot and store at -20°C to -80°C for up to 6 months. Avoid freeze thaw cycles.

Formulation

1M PBS (58 mM Na₂HPO₄, 17 mM NaH₂PO₄, 68 mM NaCl, pH8.0), added with 300 mM Imidazole

and 0.7% sarcosyl, 15% glycerol.

Usage Guide

Storage

Store it under sterile conditions at -20°C to -80°C. It is recommended that the protein be aliquoted for optimal storage. Avoid repeated freeze-thaw cycles.

Reconstitution

Reconstitute at 0.25 µg/µl in sterile water for short-term storage. Reconstitution with 50% glycerol solution is recommended for longer term storage (see Stability and Storage for more details). If a different concentration is needed for your purposes please adjust the reconstitution volume as required (please note: the ion concentration of the final solution will vary according to the volume used). Note: Centrifuge vial before opening. When reconstituting, gently pipet and wash down the sides of the vial to ensure full recovery of the protein into solution.

SDS-PAGE

Recombinant human GTF2H3 SDS-PAGE
